## EDUCATION

---

### Virginia Tech

Bachelor of Science

Major in Cognitive and Behavioral Neuroscience ; Minor in Biology

Dean's List 2021-2023

Relevant Coursework: Data Analysis, Clinical Research, Project Management

Blacksburg, VA

August 2019 - June 2023

## Personal Summary

---

I recently graduated from Virginia Tech with a degree in Cognitive Neuroscience and a minor in Biology. Alongside my studies, I also gained leadership experience mentoring freshmen and organizing events for VT's STEAM community. Prior to college, I volunteered at the local Hospital (Stony Brook University, NY) for six months maintaining lab and clinical equipment, while attending Computer Science classes. Through these experiences, I developed an early interest in the Biology of neurodegenerative diseases, which drove me to seek my undergraduate training at the first School of Neuroscience in the country, which now motivates me to pursue a career understanding the biological processes underlying human cognition.

## WORK EXPERIENCE

---

### Stony Brook Medicine

Volunteer (Equipment Maintenance),

New York, NY

Sep 2018 – Mar 2019

I was tasked with maintaining a variety of hospital equipment, both ensuring their proper functioning, and placing it throughout the hospital in good working order. In case of any equipment issues, I was trained to identify/fix minor problems and, if necessary, arrange for disposal, or transfer to qualified personnel in case of major problems.

## ACTIVITIES

---

### Orion Living Learning Community (LLC) at Virginia Tech

Mentor

Blacksburg, VA

August 2020 – Mar 2021

- Organized and planned a variety of events for LLC members, ranging from recreational to academic
- As a mentor for college freshmen, my role involved facilitating connections between students and various campus resources and activities related to their courses. I aimed to foster social inclusion by helping them build meaningful relationships with their peers, while also providing a supportive space where they could freely discuss any personal matters that may arise.

### Neuroscience Club at Virginia Tech

Member

Blacksburg, VA

August 2019 – May 2023

- Participated in events aimed towards exposing children to Neuroscience related topics through fun displays and activities
- Weekly discussions on current events related to the field as well as sharing research opportunities amongst each other
- Attend volunteer work such as trash and river cleanups

## ADDITIONAL

---

**Technical Skills:** Proficient in R; Exposure to Python; Competence programming spreadsheets

**Languages:** English (native), basic Portuguese.
